

Dermatopathology: Diagnosis by First Impression

By Christine J. Ko, Ronald J. Barr

Although other Atlases exist, they are organized by disease. This atlas takes the appearance as the starting point for learning how to differentiate similarly presenting problems. It concentrates on the most common diseases rather than being comprehensive, which can be confusing to the trainee.

This new edition includes 15 new topics and all improved microphotographs.

- Dimensions: 10.95" h x .66" w x 8.72" l, 2.05 pounds
- Binding: Paperback
- 296 pages

editorial:

Review

“This is a high quality book that would be useful to help prepare for board examinations or to help learn dermatopathology initially.” (*Doody’s*, 27 April 2012)

Review

"Christine Ko's book is SUPERB. I LOVE using it while I'm studying... it has been great for boards prep"
–**Kavita Mariwalla MD**, *Resident, Yale Department of Dermatology*

From the Back Cover

The atlas that helps you differentiate visually similar diseases

Written from a trainee's perspective, the second edition of *Dermatopathology: Diagnosis by First Impression* uses more than 800 high resolution color images to introduce a simple and effective way to defuse the confusion caused by dermatopathology slides. Focused on commonly tested entities, and using low- to high-power views, this atlas emphasizes the key differences between visually similar diseases by using appearance as the starting point for diagnosis.

The Second Edition provides:

- 800 high resolution photographs
- 'Key Differences' to train the eye on distinctive diagnostic features
- Disease-based as well as alphabetical indexes
- 30 new disease entities

Dermatopathology: Diagnosis by First Impression, Second Edition, introduces a simple and effective way for you to approach dermatopathology.
