

Freedom from Fear, Freedom from Want: An Introduction to Human Security

By Robert J. Hanlon, Kenneth Christie

Adopting an interdisciplinary perspective, *Freedom from Fear, Freedom from Want* is a brief introduction to human security, conflict, and development. The book analyzes such key human security issues as climate change, crimes against humanity, humanitarian intervention, international law, poverty, terrorism, and transnational crime, among others. The authors encourage readers to critically assess emerging threats while evaluating potential mechanisms of deterrence such as conflict resolution, economic development, diplomacy, peacekeeping, international law, and restorative justice. Concise yet comprehensive, *Freedom from Fear, Freedom from Want* is an ideal text for human security courses.

Review

[...] a unique, valuable, up-to-date work that belongs in most academic libraries, and that could also serve as a textbook for an introductory undergraduate course in human security. (*CHOICE*)

Review

Theoretical grounding, policy relevance, and up-to-date case studies: Hanlon and Christie blend all of these into an overview of human security useful for students, teachers, policymakers, and anyone who cares about the human condition in the twenty-first century. (Charli Carpenter, University of Massachusetts, Amherst)

This book fills two gaps in the field of human security studies: it provides a comprehensive and updated overview of the human security paradigm that encompasses all of its main ideas and concepts; and it integrates economic factors into the discussion, including on topics related to conflict and global governance. The range of contemporary issue-areas covered here is impressive, and includes the Syrian civil war, the prevalence of sexual violence, and transnational corruption. The text speaks directly to subjects that students are studying today and should be required reading. (Brent E. Sasley, University of Texas at Arlington)
